This message came from outside your organization.

Hi All

Thanks S [REDACTED] for the email- we also all thought the lanterns were a great success- lots of thank yous from the Abergele community.

Myself (P [REDACTED]), D [REDACTED] (both from The Peculiar Gallery) & F [REDACTED] (Blue Garlic creates) organised the whole Jubilee Arts event jointly.

I (P [REDACTED]), was lead on the Willow lanterns, having created the lanterns previously, taught willow sculpture before, and I made the articulated fish sculpture.

F [REDACTED] learnt the technique through our experimentation, and was able to construct a great seahorse structure, and we both worked with the community making the jelly fish sculptures.

D [REDACTED] was also involved in the parade, when we all of us "paraded" with the light sculptures along Pensarn prom at the beacon event. (We'd asked Alan if this was ok and he said to join in).

Would be great to have a chat about funding much bigger sculptures (which I have made previously in various forms through Arts Council funding), including wearable forms for another event in Abergele. Alan mentioned a winter light parade as a possible. We would need funding for this type of event as we stretched the funding for the Jubilee event really too far to cover everything we did, so ourselves at The Peculiar Gallery, and F [REDACTED] at Blue Garlic also became sponsors of this community event.

Would you like us to send you our CVs to help with further funding and so you can see our previous experiences/skill sets?

The gallery number is [REDACTED] and with notice, we can always all meet you there. (I'm at The Ceramics Wales event this weekend at Bodrhyddan but usually available).

Please keep in touch, and so pleased you heard good reports about our events.

All the very best

P [REDACTED], D [REDACTED] & F [REDACTED]

Mr G J Williams Assessor 01745 353581

REPORT - GWP Electrical Ltd

ATC Christmas Motif Report

6 May 2022

Identified 5 Observations

Observation 1

1

Inspection and Reporting Investigation

Task:

To investigate Faults on 5 random Faulty Motifs

We installed new AC/DC converters to 5 random Twinkly stars , unfortunately this has Not repaired the fittings.

During closer inspection and testing of the Motifs, signs of damage to the LEDs were showing.

We have inspected all the faulty fittings and found that they all shows small signs of blown LED units - This may have been caused by a power surge or water ingress into the LED mini PCB/Terminals.

The surge may also have caused some RCDs to fail within the lamp columns.

An inspection of the recent lighting certificate should show if any have failed and require replacement in advance of Christmas 2022.

Options moving forward:

1. Repairs to LED strips by replacing sections would cost between 150 - 300 + VAT per Motif depending on amount of strips to be cut out and re-installed into the pattern.

2. Replacement would cost £390 + delivery + VAT (Delivery of 10 units would cost £125 + VAT)
